

Battery- Powered Convenience

at the touch of a button.

Introducing our newest elevator, the **Carolina Residential Elevator!** The AmeriGlide Carolina Residential Elevator is a through-the-floor elevator that doesn't require a hoistway. *Its the first ever battery powered elevator that works even during a power outage!*

Unlike other home elevators on the market, the Carolina Elevator features a space-saving retractable door, reducing the overall footprint required for installation.

The Carolina Elevator is beautifully designed, functional, sturdy, reliable and unobtrusive to add in extra value to your home.

Key Features

- No elevator pit or room required
- Can be installed against any wall
- Minimal construction required
- No special wiring required
- Can run in both directions if power fails
